

# This is one of the most simple theory of basic linguistics

## No tense, basically. It's beneath your thought.

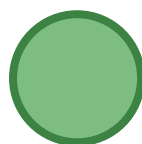

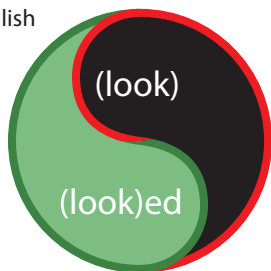

Japanese

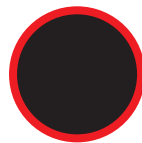

### Existences being opposed, and consist of cognition

"Cognitive Object" is opposed to "Cognitive Subject".  
On the other hand, "cognition" consists of the coexistence with  
"Cognitive Object" and "Cognitive Subject" together.

English

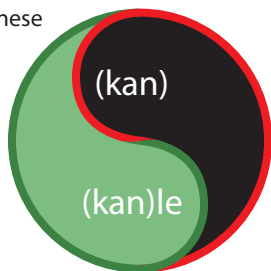

Cognitive Object

Cognitive Subject

Chinese

Cognitive Form of "Ukeai (Assurance)"  
(Speaker's Subject assures of Cognitive Object.)

Cognitive Form of "Uketome (Awareness)"  
(Speaker's Subject aweres of Cognitive Object.)

## Attention

We have to pay attention to what Cognitive Forms are quite different from consciousness of thought. Even thought belongs to Cognitive Object what is cognized by Cognitive Subject.
